Orca Photonic Systems, Inc. announces that Patrick J. Momony has joined Orca as a senior consultant for both technical and business development of industrial laser cutting applications.

Before joining Orca, Mr. Momony was President of Edgewise Tools, Inc. Edgewise has been an acknowledged leader in Laser Cutting technology for non-metallic materials since 1990. The technology and products originally developed by Edgewise Tools were recently acquired by Orca Photonic Systems.

According to Steve Moody, Orca's Vice President of Development, "Pat Momony's vast wealth of experience in laser cutting applications, combined with Orca's strong track record of laser system development, gives us an exceptional team Orca diversifies into the laser cutting market. Growing on the base of the current Edgewise Tools products, Orca will continue to laser cutting deliver systems that meet the real needs of customer applications, combined with outstanding technical capabilities, unmatched cost effectiveness, and very strong after-sales support and service.

**For Immediate Release**

Orca Photonic Systems specializes in laser and electro-optical systems for industrial processing applications. The company manufactures, integrates, delivers and supports a wide variety of systems used in manufacturing for fiberoptic telecommunications, and in automation of large scale laboratory processes for biochemical and genetic analysis.
